1 Preface

Every turn of the year is an invitation to look back, what took place but at the same time, an invitation to see the plans for the coming year. The annual report on which these matters are discussed is the means for ICEVI-Europe to be accountable to the members of the association. That is why I would like to offer the 2018 annual report to your attention.

The Board has met once in April 2018 in Birmingham. One of the main points discussed was the plans for the next four years, i.e. Until 2021 when the first forthcoming European conference is scheduled and the General Assembly. Through the website you have already been able to get acquainted with the current state of affairs regarding the organisation of regional conferences. A conference for Eastern European countries has already taken place in October 2018 in Saratov, Russia, while a conference for the Balkan countries will be held in October of this year in Sofia, Bulgaria. For the other regions, ICEVI-Europe works together with GPEEA for the French speaking countries and VBS for the German speaking countries.

Another important fact is the realization of professional interest groups. The mission of ICEVI-Europe is "Sharing information and knowledge in the field of education and rehabilitation of people with visual impairment." There is no better setting in which this can be achieved, than within a network of professional colleagues working in the same field of interest. Professional interest groups offer new opportunities to get to know fellow colleagues in Europe. In the new year, conferences of certain professional interest groups will be held on education, with the theme of mathematics and on rehabilitation with the theme "Expanding Independence in all Ages." It is the wish of the board that before the 10th European Conference in Israel, conferences or workshops of all of the professional interest groups will be held, with the goal to hold follow-up meetings of the professional interest groups during the 10th European Conference.

Of course, many other issues have also been raised. The board will be happy to keep you informed via the Newsletter and via the Website, and at the same time, warmly invites you to enrich our Newsletter Issues with your contributions by publishing articles, materials, and/or announcements of any special projects, events and activities of importance in the field of education and rehabilitation of people with visual impairment within your countries.

Have fun reading this annual report. It is our hope that this will inspire you to cooperate with fellow colleagues in and beyond Europe. Perhaps we meet at one of our conferences, otherwise, certainly at our milestone conference, the tenth European Conference in Jerusalem in August 2021.

A good opportunity to remind you to pay your annual membership contribution. Your membership fee is crucial to the work of ICEVI Europe. Membership fees are the organization's lifeblood and they enable us to continue to promote international cooperation in broadening the knowledge and skills of professionals working in the education and rehabilitation of persons with visual impairment.

The board would like to thank all of you who have contributed and given shape to ICEVI-Europe activities in 2018. We hope you will continue to participate in 2019 with the goal of improving the quality of services to people with visual impairments.

This Annual Report was sent to all of the National Representatives, being that they are members of the General Meeting, asking for their agreement. We have made some textual changes to the Annual Report, as per the feedback provided by the National Representatives, and it was approved by them.

On behalf of the Board,

Hans Welling
President

www.icevi-europe.org

2 Report from the board

ICEVI-Europe aims to support persons with visual impairment achieve their desire to actively participate as full members of the society.

Making an annual report is therefore an excellent opportunity to look back and see how it is shaped.

Communication with members is of course very important. As usual, in 2018 we also took care of newsletters for members and interested parties, 3 in total and keeping the website up to date, but also Facebook. In addition, the board members seek to keep contacts in their own region.

ICEVI-Europe was pleased to launch a new website in June 2018. Its new website was created with a modern graphical design and new structure and is accessible to people with visual impairment.

The board came together once in Birmingham. Prior to the board meeting, the Programme Committee of the Conference 2021 met for the first time.

In addition to the preparations for the European Conference in 2021 in Jerusalem, the action plan for the coming years was central. The Board had decided to make such a programme at its meeting in 2018 in Helsinki. Central to this action plan are organising regional conferences and conferences of professional interest groups.

In 2018, the eighth ICEVI conference for Eastern European countries took place in Saratov Russia. There were more than 200 participants. In the December 2018 Newsletter issue, an article was published on this successful conference. In the same newsletter a report was made of the 7th Conference On Psychology and Visual impairment held in Thessaloniki, Greece.

The program was central to 2019.

-A French Speaking ICEVI-Day: 1 Day Workshop for French-speaking members in Paris with the theme, "Visual impairment and inclusive education. What's new."

-A two-day conference of the Professional Interest group, Teaching and Teacher training with the theme, "What is good can always be better. Wondering how to improve the mathematical performances of blind students. "

-A two-day conference of the Professional Interest group, Rehabilitation with the theme, "Expanding Independence in all Ages."

-A Conference of the Balkan countries in Sofia. It is the Seventh Balkan conference.

-A conference of the of the Professional Interest Group, Early Intervention is in preparation, as well as, that of the Professional Interest Group, Vocational Training and Employment-rehabilitation.

-ICEVI-Europe collaborates with GPEAA in France and VBS in Germany to prepare regional conferences there.

In this way, the board of ICEVI-Europe gave concrete substance to the objective of the association.

We encourage you to visit the website of ICEVI-Europe www.icevi-europe.org for further information.

The President of ICEVI-Europe attended the meetings of ICEVI-World and continued his role as Regional Development Advisor of ICEVI-World in connection with the Regional Chairs/Presidents of the ICEVI regions, which entails discussing with the regions the process of making constitutions and registering themselves as legal entities. He attended the EXCO Meeting of ICEVI-World on 15 October 2018 in Manila, The Philippines. He also attended, as a Keynote Speaker, a seminar with the title, "Inclusion of the Visually Impaired in the mainstream Education schools and the Role of the Visiting Teacher in this process" organized by the Lithuanian Centre for the Blind and Visually Impaired in October 2018 in Vilnius, Lithuania.

3 ICEVI-Europe activities in 2018

Report from the Baltic and Nordic countries by Anne Kristine Grosbøll

Region: Nordic-Baltic region

Period: 2018

Area of Reference	Description
Regional and Sub-regional committee meetings conducted, if any	<p>Finland: Consulting teacher Tuija Piili-Jokinen from Valteri participated in Nordic Braille Meeting in Oslo, Norway on October 18th-19th 2018 Theme, 1. day: Early intervention for Braille Literacy, 2. day: Braille music</p>
Seminars, workshops, capacity building programmes, if any conducted during the reporting period	<p>Finland: Päivi Lång and Misa Möller from Valteri attended MDVI Euronet Annual Meeting in National Center of the Lega del Filo d'Oro, Osimo, Italy on June 4 – 6. 2018. The subject of the meeting was “Good practices among MDVI students”.</p> <p>Consulting teacher Riitta Kangasaho from Valteri Onerva attended the Learning Media Assessment – seminar in Stockholm, Sweden on November 20 - 21.2018</p> <p>Psychologist Elina Lehtinen from Valteri attended the 7th ICEVI European Conference on Psychology and Visual Impairment in Thessaloniki, Greece on November 1. – 2. 2018.</p> <p>National training days for multiprofessional staff working with children with visual impairment was organized on December 3 – 4.2018. This annual meeting offers a great possibility for the specialists as teachers and rehabilitation workers to hear the latest situation with the services and trends on the area and naturally discuss and change ideas.</p>

Area of Reference	Description
	<p data-bbox="563 232 1318 300"><u>ERASMUS + Project "JNCL and Education" 2014-2017</u></p> <p data-bbox="563 304 1334 1032">Tarja Eskonen, Consulting teacher and Marja-Leena Forssas, Mobility and Orientation specialist, Valteri Centre for Learning and consulting, Onerva The Valteri Centre for Learning and Consulting, Onerva was involved in the three-year (2014-2017) ERASMUS + project. The project was called "Juvenile Neuronal Ceroid Lipofuscinosis and Education". In addition to Finland, Norway, England, Scotland, Germany received project funding from EU. The Danish Family supporting association and Batten disease support and research association, US were involved in the project with their own funding. From each of the project countries includes visual impairment schools, learning and consulting centres and parental associations. Finland's project co-operation partners were also the Finnish Federation for the Visually Impaired and the Finnish JNCL Family Supporting Association. The project was coordinated by Bengt Elmerskog from Stadped Heimdal, Norway. The working language was English.</p> <p data-bbox="563 1037 1342 1397">The first formal project meeting was held in Oslo in December 2014 and the last formal one in June 2017 in Jyväskylä, Finland. The project meetings consisted of contact persons from each country (1-2 persons) and representatives of parents' associations. At the meetings the Valteri Center for Learning and Consulting, Onerva was represented by Marja-Leena Forssas and Tarja Eskonen and Finnish Federation for the Visually Impaired was represented by Maria Liisa Punkari.</p> <p data-bbox="563 1442 1334 1733">The target group in this project included Juvenile Neuronal Ceroid Lipofuscinosis (JNCL) children, young adults, their families, local networks, teaching staff (basic education, special education and vocational education) and other specialists and professionals in the field (eg speech therapists, physiotherapists, occupational therapists, mobility and orientation specialist and low vision specialist.)</p> <p data-bbox="563 1778 1334 2022">The purpose of the project was to compile a non-medical book that compiles existing knowledge and information obtained during the project and experiences. The material was also compiled into an educational material package, educational tools that can be to share in educational meetings, seminars, conferences, etc. Lifelong learning and quality life was</p>

Area of Reference	Description
	<p>the guiding idea of the project. During the project a study was conducted involving parents, teachers and other professionals. The survey was made through a questionnaire and a few of the target groups were selected for a deep interview. The research material was handled at the University of Oslo psychology department under Professor Stephen von Tetzchner.</p> <p>The new coming book is called:” Juvenile Neuronal Ceroid Lipofuscinosis, Childhood Dementia and Education, - Intervention, education and learning strategies in a lifetime perspective.” edited by Stephen von Tetzchner, Bengt Elmerskog, Anne-Grethe Tøssebro and Svein Rokne. The book is currently being printed and it will be published in January 2019. The book can be inquired / buy from coordinator of the project, Statped Heimdal, Norway and its project partners.</p> <p>Sweden:</p> <p>A NOVIR-seminar was held the 20-21 of November 2018 in Stockholm with the theme Learning media Assessment. NOVIR - Nordic Visual Impairment Network is a Nordic co-operation in the field of visual rehabilitation. The network consists of national vision rehabilitation institutions from Denmark, The Faroe Islands, Finland, Iceland, Norway and Sweden. The seminar was arranged by the National Agency for Special Needs Education and Schools/ Resource Centre Vision.</p> <p>Norway:</p> <p>Statped has arranged workshops in different regions of Norway in the use of VoiceOver on iPhone/iPad for educators working with adults with blindness or highly visual impairment. These workshops have been arranged together with the Centers for adult education and/or aid centers in the regions.</p> <p>Statped has also arranged workshops in accesibility on PC and in reading for educators working with students and adults with visual impairment.</p> <p>Statped has during fall 2018 produced videos about accessibility on iPhone and iPad for visual impaired. These are available on YouTube and during spring</p>

Area of Reference	Description
	<p>2019 will be used as a part of a learning resource on the webpage statped.no.</p> <p>Statped arranges yearly a seminar about CVI, and in 2018 it was streamed for the first time to all the regions in Statped. The participants were educators and parents of children with CVI. In every region there were visual therapists that supported the participants in discussions, tasks and answering questions.</p> <p>Capacity building: The Project «JNCL and Education was implemented and concluded during the reporting time</p> <p>Denmark:</p> <p>Danish Pre-employment Program, PEP The Pre-employment Program, PEP, has been developed and tested by Ph.D. Karen Wolffe in different English-speaking countries with a good effect. IBOS and the socio-economic company All Ears TM A/S are adapting the PEP-material to Danish language and conditions. The PEP program consists of 15 special VIP designed one-day modules. After a 4-day workshop with Karen Wolffe, May 2018, we could offer the first free trial run for 9 job ready and seeking adults with a visual impairment. 2nd PEP trial will be terminated Jan. 2019.</p> <p>Documentation of the participant's assessment of their self-efficacy before and after PEP, plus their written and oral evaluations show a positive empowering effect. So far three out of nine have found employment, two are doing practice in an organization, two will start a new education and two are still looking for a job. The participants will be followed for a year to document their results.</p> <p>The idea is that participants go to work, except that their work in PEP is to prepare themselves to look for work. How to analyze your own dreams and competencies and find out which companies has the in-teresting jobs, match the jobs to your abilities, decide when to disclosure your disability to an employer, learn what the expectations at a workplace are, build a job seekers portfolio, train and perform a job interview, get feedback, etc. The purpose of the program is to boost the participants own capability to find themselves a job, so</p>

Area of Reference	Description
	<p>that the number of people with a vision impairment, included in the labour market and who can earn their own income, will increase.</p> <p>Two more PEP rounds will be offered around the country May and Oct. – Nov. 2019</p> <p>The PEP-project has been funded by the Danish Agency for Labour Market and Recruitment (STAR) 2017 - 2020.</p> <p>Link to more info on PEP in Danish: www.ibos.dk/pep</p> <p>Project manager: Dorthe Marie Degn, Development and Project Consultant, IBOS, ab8e@kk.dk</p> <p>Poland, Lithuania and Denmark:</p> <p>EchoProVIP – echolocation for professionals working with persons with a visual impairment.</p> <p>The Regional Development Foundation, FIRR, Krakow, is managing a two-year (Dec. 2017- 2019) EU Erasmus+ K2 project, where IBOS and the Communication Centre, Reg. H. will teach 12 Polish and Lithuanian O&M instructors how to develop their echolocating skills and teach individually adjusted Echolocation.</p> <p>The project results will be disseminated in a European Curricula, a Compendium and at national conferences and in recommendations for integrating echolocation into mainstream O&M education of Instructors and vision impaired persons.</p> <p>Project Manager Anna Rozborska, FIRR, Poland, anna.rozborska@firr.org.pl</p> <p>IBOS: Dorthe Marie Degn, ab8e@kk.dk</p>
<p>Collaborative activities and meetings with world bodies such as WBU, IAPB, UN, World Bank, and other organizations at the regional level</p>	<p>Denmark and Sweden:</p> <p>The final report was published in January 2018 from a two-year project investigating the situation in Braille teaching and literacy in nine European countries. Sweden was one of the countries involved with a representative in the steering group. The project was led by the Danish Association of the Blind for the European Blind Union, EBU, and involved Braille users working with ICEVI, service providers and others with an interest in supporting the use of Braille.</p> <p>Download the final report from the EBU webpage</p> <p>Norway:</p>

Area of Reference	Description
	<p>Informal meeting with NBHP (National treatment on hearing loss and mental health), discussing if this also should concern visual impairment.</p> <p>Meetings with National association of the Blind and Partially Sighted</p> <p>The Norwegian University of Science and technology, five courses:</p> <ol style="list-style-type: none"> 1: Educational principles and teaching methods of people who use braille. Credits 20, two semesters. 2: Mobility learning of visually impaired children, youth, and adults. Credits 20, two semesters 3: Educational technology for the visually impaired. Credits 20, two semesters 4: Introduction to Visual impairment and the work of teacher of the visually impaired. Credits 20, two semesters 5: Special educational needs in teaching and (re)habilitation of students with VI. Credits 20, two semesters

Licentiate thesis Author: Elina Annikki Lehtinen elina.lehtinen@valteri.fi</p> <p>The evaluation method is named SoLa according to the target group (Finnish: <u>S</u>okeat - means blind and <u>L</u>apset – means children). The SoLa form, developed during the research is meant for evaluation of blind or severely visually impaired children and information transfer during the pre-school year and when a child is moving from pre-school to school. It can be used for example by the pre-school education staff and others working with children. To improve the usability of the SoLa form, a manual should be drawn up, containing familiarization with the evaluation of a blind or severely visually impaired pre-school-aged child's skills and needs.</p> <p>Education of special psychologists in developmental and educational psychology University of Jyväskylä, Department of Psychology April 2017 The outright report is available in Finnish at the address: https://jyx.jyu.fi/dspace/handle/123456789/55278</p> <p>Valteri Centre for Learning and Consulting has six units in different parts of Finland. During the academic year 2018 – 2019 Valteri Onerva organizes training for teachers and rehabilitation workers in other Valteri units. The focus in this training is teaching pupils with low vision.</p> <p>Sweden:</p>

Area of Reference	Description
	<p>Kim de Verdier, PhD, psychologist at the National Agency for Special Needs Education and Schools/Resource Centre Vision defended her theses “Children with blindness: Developmental aspects, comorbidity and implications for education and support” in August 2018 at Stockholm University. The overall aim of this research is to deepen the knowledge about developmental aspects, comorbidity and implications for education and support provision, regarding children with blindness. Special focus is directed towards children with blindness and autism spectrum disorder (ASD). Read more at: http://www.diva-portal.org/smash/record.jsf?pid=diva2%3A1206093&dswid=-5923</p> <p>Norway:</p> <p>The Project “JNCL and Education” included a comprehensive research part and identification of best educational practices. These facts and advices are presented in the book «Juvenile Neuronal Ceroid Lipofuscinosis, Childhood Dementia and Education»</p> <p>On-going projects.</p> <ul style="list-style-type: none"> - Children who will be learning braille: Early intervention for braille literacy in the kindergarten. - Learning environment and inclusion of persons with visual impairment. <p>For more information: https://novir.net/fileadmin/Newsletters/NOVIR_newsletter_2018.pdf</p> <p>Denmark:</p> <p><i>RETEPP™-test</i> <i>The RETEPP™-test consists of a story part and a picture part. The story part is the most central part when it comes to assess the reduction of the executive functions.</i></p> <p>The history part is one of the two tests, IBOS’ neuro psychological consultant Tom Andersen has developed, that places persons with a visual impairment on an equal footing with seeing persons regarding the text (the other is “the red box” or the NVO-test (Non-Visual Orientation)).</p>

Area of Reference	Description
	<p>The Monography about the <i>RETEPP™-test</i> can be found online at Tom Andersons homepage: http://reallifetests.dk where you can also find a Danish layman version for blind at www.retepp.dk</p> <p>Research in the effects of Neuro Technology Training</p> <p>IBOS, as the only place in Scandinavia, offers a dynamic Neuro Vision Training, NVT, to persons with a brain damage - often stroke related - that has affected their vision. A research protocol has therefore during 2017 been set up in cooperation with Herlev University Hospital and external reviewers, to measure the effects of NVT. The Ethic Committee has given their accept of the research design. Approximately a third of those referred from hospitals to take the tests passes the researchers exclusion criteria. Currently eight persons have passed the program. Danish Eye Doctors are participating as partners, if a control group is set up. So, we are currently trying to fundraise extra for this, as it prolongs the project, but also make the results more interesting.</p> <p>Project manager at IBOS: Anne Marie H. Schaarup, occupational therapist and Team Manager, ab7n@sof.kk.dk</p> <p>Link to the research article: https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5849800/</p>

Report from the Central European countries by Beata Pronay

Region: Central Europe region

Period: 2018

Area of Reference	Description
<p>Regional and Sub-regional committee meetings conducted, if any</p>	<p>Czech Republic National representative wrote: I have no information, who is member of ICEVI in our country, so I send all news to all schools, resource centres, universities, no individual contacts</p> <p>Slovenia TIFLO section, a section within Association of Special Pedagogues of Slovenia, which is a group member of ICEVI and assembles professionals working in the field of education for children and young people with visual impairment, successfully continued its mission in 2018 playing an important role in providing new knowledge and information for the professionals in the field. There were two meetings in 2018: in June and August. The first one dealing with Daisy format of books and the second one setting some guidelines for printing enlarged materials for the partially sighted pupils and students. There are also four commissions working under the umbrella of TIFLO section. The section was active within the umbrella association on different levels as well.</p>
<p>Global campaign activities, if any</p>	<p>Slovenia Active participation in several international projects and preparing new applications:</p> <ul style="list-style-type: none"> - Opeye (Open and portable software library for rapid eye tracking) Erasmus+, KA2 Erasmus+ project, coordinated by Institut pour Déficients Visuels from Luxembourg continued its work in 2018. They are in the final year of the project and

	<p>in November, a project meeting was held in Ljubljana.</p> <ul style="list-style-type: none"> - SMILE! A new Erasmus+ KA1 project started in autumn 2018 with the first training event taking place in Belfast, at Jordanstown school, in November. A team from The Centre IRIS actively participated. The project deals with socialisation issues of children and young people with visual impairment. The plan is to upgrade it into KA2 project with up to 10 partner organisations from different European countries in 2019 as socialisation is considered a vital competency within extended curriculum for successful inclusion in the labour market and society in general of the target group.
<p>Seminars, workshops, capacity building programmes, if any conducted during the reporting period</p>	<p>Czech Republic Our professionals attended ECPVI in Thessaloniki 4 people Early intervention EDA had poster presentation about crisis intervention in families with visually and multiply impaired children</p> <p>Hungary <u>School for the Blind: Erasmus + projects:</u> I EXPRESS I. project: January 2018, Budapest (dissemination meeting). I EXPRESS II.: March 2018 submission of the KA2 application for the continuation of the collaboration coordinated by V ISIO from the Netherlands. SMILE project: February 2018 submission of the KA1 project (grant received.). Hungarian Association for the Blind was celebrating its 100 years anniversary. During the centenary year several events were held. Beside other important events to mention some examples are: the Braille-books library was renewed and renamed, there were 100 new volumes introduced to the members. An application helps people to access the talking library since November 2018. A new project called “TeleEye” started its services mostly for blind individuals. The project gave 800 cell phones to potential testers. The test period runs for 8 months and help is available for 24 hours in any subject e.g. reading up labels when shopping etc. during this period.</p> <p>Poland “The darkness lab” – series of workshops conducted in Warsaw, raising awareness of challenges connected with visual impairment. Workshops provider: PZN (Polish Association of the Blind) <u>September 2018</u> New trends in mobility and orientation instruction” – seminar organized in Warsaw</p>

by FIRR Fundacja Instytut Rozwoju Regionalnego) and UTILITIA – for 45 O&M instructors.

Centrum Rozwoju Inicjatyw Społecznych CRIS (Civil Initiatives Development Center) based in Rybnik, Upper Silesia. A series of workshops raising understanding of visual impairment. Addressees of the workshops:

- schools, employees of fiscal offices, doctors and nurses from local hospitals
- clergy (“Disabled person in the church”)
- police, public prosecutors and administrative staff of public prosecutor departments of the Silesia region about communicating with disabled victims, witnesses and accused. As an outcome of this project 26 recommendations were made for institutions participating in this project which will facilitate communication between jurisdiction and persons with disabilities including those with blindness. They have been sent to politicians and to the commissioner for human rights.

October 2018 “REHA FOR THE BLIND IN POLAND “.

- International Conference and Exhibition.

A very important event, organized annually by the Chance for the Blind Foundation. It is the biggest event of its kind in Central and Eastern Europe and has earned the status of a world- wide event. The exhibition and accompanying conference attract the attention not only of persons with a visual impairment but also of professionals and persons who want to know more about the latest technology developed for overcoming the challenges caused by blindness. Each year “REHA FOR THE BLIND IN POLAND” gathers several thousand visitors from different, sometimes very distant countries.

“Eye Care Conference”- Warsaw

“A Classroom without a blackboard” – a permanent exhibition accompanied by workshops for sighted children building a positive image of persons with a visual impairment. Provider: KUL CAN (The John Paul II Catholic University of Lublin Centre for Promoting activeness of Persons with Disabilities.

Marek B. (The John Paul II Catholic University of Lublin) “The Hungry Fingers Way to Tactile Graphics. Simple tools for Explaining Complex problem”. A series of workshops for children with a visual impairment and training for teachers in introducing raised line drawings offered in twelve VI centres in

Australia and at Jyothi Seva Home for Blind Children in Bangalore (India)

Marek B., Szubielska M., Niestorowicz E.

“Congenitally blind children drawing for the first time: Lessons for practitioners and researchers” Paper presented at Round Table on Information Access for Persons with Print Disability. Sydney 5-8 May 2018.

Marek B. “Developing skills for confident use of tactile drawings, diagrams and maps”. Paper presented at Round Table on Information access for Persons with Print Disability. Sydney 5-8 May 2018 TO BYM DAŁA DO PUBLIKACJI

Slovakia

1. 3rd International RoboBraille conference: 23. - 24. October 2018, Bratislava.

The conference was aimed at sharing good practice with the application and use of the RoboBraille system (both the recognition of documents and the RoboBraille library). Conference participants were from several European countries = Romania, UK, Czech Republic, Hungary.

2. 7th conference on accessing culture by blind and partially sighted - the importance of Braille in the 21st century and its perspective. 24. - 25. October 2018, Bratislava.

This conference was oriented mainly at various usage of the Braille - at education, in museums and in the library. Speakers mostly from Slovakia and the Czech Republic presented their perspectives on Braille alphabet and Braille literacy. The conference spectatorship was made-up from professionals representing organizations of visually impaired, cultural and educational institutions promoting inclusive teaching / access to culture.

Slovenia

Most children and young people with visual impairment are being educated in inclusive forms of education, therefore we still consider empowering professionals in mainstream schools our primary task. The Centre IRIS – Centre for Education, Rehabilitation, Inclusion and Counselling for the Blind and Partially Sighted, as a partner in the national project, delivers programmes in different forms e.g. one or several-day courses, workshops either at the Centre or at schools/pre-schools where VI/MDVI children are educated, which have been well accepted and the system of counselling, tailored to the needs of schools, is more and more established in the system.

	<p>- The annual two-day conference of Association of Special Education Teachers of Slovenia entitled, The meaning of social inclusion of SEN children, young people and adults was held in March in Portorož with active participation of our members.</p>
<p>Collaborative activities and meetings with world bodies such as WBU, IAPB, UN, World Bank, and other organizations at the regional level</p>	<p>Hungary ENVITER board meeting: January 2018, Budapest School for the Blind “Blue Sky” meeting: planning the future projects under the ENVITER umbrella, June 2018, Budapest School for the Blind (4 colleagues participated).</p> <p>Poland Participation of Polish delegates in the third meeting of the „Beyond Barriers and Borders” project in Vienna. Project involving Poland, Belgium and Austria financed by Erasmus. Duration of project: 2017 – 2018 FIRR (Fundacja Instytut Rozwoju Regionalnego) “Echolocation for persons with a visual impairment” – an Erasmus strategic project in partnership with Denmark and Lithuania FIRR (Fundacja Instytut Rozwoju Regionalnego) “Applications and Web Content Accessibility Training” AWCAT- an Erasmus Plus Strategic Partnership project involving Austria, Bulgaria and Poland. Project aiming at developing a blended learning course for students of computer science and informatics with a view to improving accessibility of digital media to persons with a visual impairment in Europe.</p> <p>Slovenia There are four commissions working under the umbrella of TIFLO section where experts from universities, people from the Union of the Blind and Partially Sighted of Slovenia representing the interested public, and professionals working in the field of education join their efforts to solve important questions that arise.</p>
<p>ICEVI collaborative work with national governments within the region</p>	<p>Hungary LÁRESZ is collaborating with FSZK (Equal Opportunities of Persons with Disabilities Non-profit Ltd) through FSZK its close connection with the Ministry of Human Resources. As an umbrella association LÁRESZ is also cooperating with many NGOs and governmental organizations working for the rehabilitation and support of VI individuals.</p> <p>Poland (1) June 2018 (2) Participation of Polish delegates in „Low Vision” conference organized by FBU of Slovenia. Conference devoted to exchange of good practice</p>

	<p>and raising standards of support for persons with low vision.</p> <p>(3) June 2018</p> <p>(4) Wrocław - Seminar on cataract with exhibition of optical aids</p> <p>(5) July 2018</p> <p>PZN (Polish Association of the Blind) Consultations for Warsaw Public Transport Office. Evaluation of accessibility of new models of buses and trams</p> <p>July 2018</p> <p>Work on Government Bill on accessible websites and mobile applications (Participants included several NGOs, among others PZN (Polish Association of the Blind), FIRR (Fundacja Instytut Rozwoju Regionalnego), CRIS (Civil Initiatives Development Centre)</p> <p>September 2018</p> <p>„To see rehabilitation of persons with a visual impairment” Conference organized by the Parliament of the Republic of Poland</p> <p>“Accessibility plus” 2018 - 2025 – implementation of Government programme focusing on accessibility in the following areas: architecture, digital, education and health.</p> <p>Continuation of the “Active Warsaw” project (started in 2016). Aim: support for families of persons with a visual impairment.</p> <p>October 2018 ‘Active Graduate” – project supporting active presence on the job market of college and university graduates with a visual impairment. Start of project:</p> <p>Slovenia</p> <p>Ongoing national projects at the Centre IRIS, especially the first two importantly supporting inclusive education:</p> <ul style="list-style-type: none"> - “Z roko v roki poMOČ” – providing professional development and counselling for mainstream teachers. - A four-year national project of implementing Centres of expertise for different areas of SEN children and financed partially by European structural and investment funds. The Centre IRIS is acting as the Centre of expertise for the fields of visual impairment and specific learning difficulties. <p>In this way inclusive forms of education are supported on one side by providing knowledge for the professionals and on the other by supporting all partners in the process: children or young people, their families and mainstream (pre)schools.</p>
--	--

	<p>A project encouraging social inclusion of the target group in the local environment: within its different modules opens new possibilities for young people with VI/MDVI entering the labour market e.g. providing qualifications for masseurs, creating post in a hostel, etc. Thus, it creates a link between education and labour market and empowers young people with VI for better quality of life</p>
<p>Awards, Recognition, etc., to ICEVI members from the region</p>	<p>Hungary Ms. Ágnes Somorjai (director of the School for the Blind) was nominated and appointed to be the ENVITER coordinator.</p> <p>Poland (6) Each year the Chance for the Blind Foundation rewards individuals and institutions supporting the blind and visually impaired. In 2018, The Maria Grzegorzewska University of Special Education won the first prize "IDOL" in the category of a friendly university for the blind.</p> <p>Slovenia Within Association of Special Pedagogues of Slovenia three awards were given to our members in 2018. Anja Pečaver and Gašper Tanšek are teachers of physical education, promoting PE for VI/MDVI children and young people in mainstream schools, they are active members in different projects and responsible that children and young people with visual impairment participate in national and international sport events. Tanja Tajnikar has been working for several years as itinerant teacher, introducing new practices into her work.</p>
<p>Publications from the Region, that may be of interest to the viewers of ICEVI website</p>	<p>Czech Republic New brochure for parents of visually impaired children published by EDA. cz, topic is CVI at preschool and school age</p> <p>Poland Szubielska, M. 6 Looking to the future

The character of an association is that the members determine the content and the course of the association. This also applies to an association like ICEVI-Europe. The spread of members across Europe and Israel is an extra challenge to indicate content here. This is an important focus for the board but at the same time for the members themselves. They can take also initiatives to activities.

Fortunately, the number of members grows and the board is also able to support some activities to some extent financially. This is currently the case for the professional interest groups.

The promotion of European networks of professionals in addition to regional conferences is of great importance. The motto is share your experiences and learn from each other. Learn to find each other if you have questions.

This year and perhaps also in 2020, there will be professional interest group conferences. At the European Conference in 2021, the opportunity was also given to follow up on this.

As we approach two and a half years before our milestone conference- the 10th European Conference of ICEVI-Europe- takes place, the board looks forward to working closely with the Israeli Host Committee in order to lay the foundation for a successful conference, giving shape and structure to it. It is the board's sincere hope that all members, supporters, fellow colleagues and stakeholders join us as conference participants at the Hebrew University of Jerusalem in Israel on August 8-12, 2021 (with August 13 -14, 2021 as Optional days for excursions) to festively celebrate our milestone conference. Save the Date and follow the news on the ICEVI-Europe website!
